

# Project for CS 476/676 Spring 2016

---

1. Team size: 2 people. We will not assign groups for project. You need to find your teammate.
2. Possible Datasets: <http://www.inside-r.org/howto/finding-data-internet#>  
You can choose other datasets of course. We will assume you have the access to the data.
3. Project ideas:  
Project titles from previous years are included in the folder as a reference. You could send Dr. Saria a note if you would like to discuss your idea with her.
4. Expected timeline:
  - a. Apr 15: Project Proposal Due
  - b. May 12: Project Write-up Due
5. Your One Page Proposal should include:
  - a. Overall goal
  - b. Data source
  - c. A brief description of approach
  - d. Team mates
  - e. References for related work
6. Final Write-up:  
It has to include:
  - a. the goal / question / hypothesis your project will explore
  - b. at least three related works
  - c. the model
  - d. the inference technique
  - e. the dataset
  - f. the experiment results
  - g. references for related work
